

XLR8 Negative Pressure Wound Therapy

The **XLR8 Negative Pressure Wound** system delivers clinically proven controlled and customizable therapy that is cost efficient for all healthcare and homecare settings.

- Weighs only 21 ounces or 1.5 pounds
- Vibrant, intuitive and easy to read LED display
- Continuous and Variable Therapy modes
- Built in 12+ hour battery; 3 hour's to recharge
- Auto "Accelerate" Mode minimizes blockages & exudates at wound site
- Advanced Alarm System with Alarm Log to document errors
- Real time display of RX'd and Actual Therapy settings
- Carry Bag for enhanced portability & patient mobility

Green Foam Dressing

- Better visualization in wound bed
- Non-adherent due to smooth pore edges
- Advanced filtration due to 3-D cell structure
- High tensile strength with less fraying
- Specialized options to minimize work during application

Silicon Port Pad

- Seamless one-piece integrated tubing provides security
- Lure lock connector minimizes leaks and disconnects
- Dome sturdy to withstand high therapy settings
- Film dressing is medical grade adhesive and pliable
- Softest patient interface available

XLR8 Drape

- 1,2,3 arrows for guided application
- Pre-marked cutting guides for easy sizing
- High transparency provides clear visibility
- Medical grade adhesive for secure seal
- Protective and gentle to delicate tissues

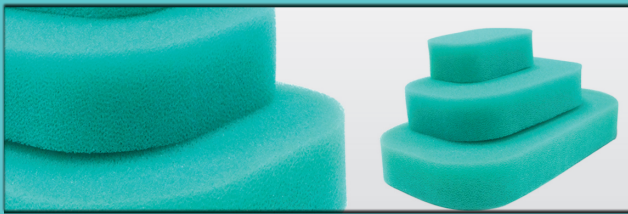

Multi-Canister System

- 200cc, 400cc, 600cc options available
- Integrated tubing with one piece construction
- Closed system provides infection control benefit
- Charcoal filter controls unpleasant odors
- Gel packets solidify contents of exudates

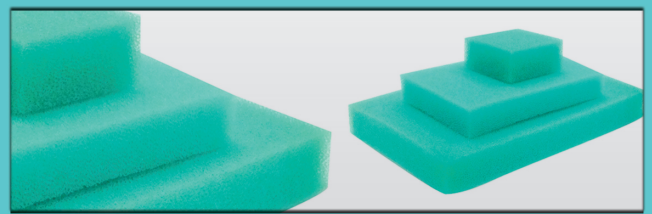

CUSTOM MEDICAL
SOLUTIONS

**Green
Foam
Advantages**

For Standard or Deep Wounds

For Superficial Depth Wounds

- Easily detectable which lessens risk of pieces being left behind thus reducing risk of infections
- Smooth surface area maximizes comfort as wound interface and conforms easily to oddly shaped wounds
- Round pore edges minimizes the tissue ingrowth and traumatic removal which maximizes viable tissues and accelerated healing

**XLR8 Green Foam
(Smooth Pore Edges)**

**Microscopic
View**

**Competitors Black Foam
(Sharp Pore Edges)**

A few advantages of Smooth Pore Edges

- Less ingrowth of tissues into foam
- Less discomfort during dressing changes
- Preservation of viable granulation tissues
- Accelerated healing and wound closure due to less trauma

Product Line Complete System includes: XLR8 Therapy Unit, Operations Manuel, Power Cable, Power Adapter, Wire Bed Hanger, Carrying Case, Canister, and Dressing Kit
